### Small and Light, a Great Fit

Designed small, these buds fit securely and comfortably in your ears. The rounded shape without edges makes them a pleasure to wear, leaving you free to focus on what matters—your music.

### Ergonomic Surface Design

Since introducing the world's first in-ear headphones in 1982 (MDR-E252), we've surveyed huge amounts of data relating to ear shapes from around the world. The WF-CS00 headphones are the product of that research, combining a shape that matches the ear cavity with a new ergonomic surface design for a more stable fit.

### Listen all day, Charge in Minutes

Enjoy up to 20 hours of listening thanks to the handy charging case. 4 And if you need to top up in a hurry, 10-minute quick charging gives you up to an hour of extra playtime.<sup>5</sup>

### One Earbud, ideal for multitasking

If you want to listen to your music while still being able to have a conversation, remove one earbud only from the charging case and use as normal.<sup>7</sup>

### Hear clearly — it's all in a day's work

With a full-range speaker unit that's angled upwards so sound is optimised for your ears alone, you'll hear every word clearly while others in the room will barely notice. Passive radiators boost the bass and advanced audio signal processing minimises feedback and echo, making every meeting effortless.

### Be heard, even when home is noisy

Whatever's going on around you, your voice will always be heard clearly thanks to Precise Voice Pickup Technology. A high-quality beam-forming array using two microphones, combined with advanced audio signal processing means that the SRS-NB10 minimises feedback and echo, whilst delivering crystal-clear voice quality to the person, or people, on the call.

### Tap to talk, tap to listen

Sometimes you're talking, sometimes you're listening, sometimes you just want the privacy of being on mute. Easily control your microphone while conferencing on communication apps with a simple click of the MIC Mute button.2

### Be Aware

The open-ear style allows you to listen to calls yet still be aware of what's going on around you.
